Carpet Recycling in California
Products Made From Recycled Carpet

More than 300 million pounds of carpet is discarded in California landfills every year – that’s the weight of 60,000 SUVs. But that carpet can be recycled into useful new products by U.S. manufacturers. Post-consumer carpet is recycled by processors into fibers or plastic pellets, which can be used to make a broad range of products, including carpet, carpet tiles, carpet underlayment and products for the automotive, transportation and construction industries.

The California Carpet Stewardship Program supports markets for recycled post-consumer carpet via grants, technical assistance and promotion.

See over for a list of manufacturers offering products containing recycled California post-consumer carpet.

See the CARE website for details and updates: CarpetRecovery.org/Products.

Recycle Commercial and Residential Carpet & Carpet Tile

Residential and commercial carpet and carpet tile can be recycled if prepared and brought to the right place. Reduced fees may apply for properly prepared carpet.

Take tear-out carpet to a CARE drop-off site – there are over 110 sites in California.

See map of drop-off sites here: CarpetRecovery.org/CA.
Recycled Post-Consumer Carpet-Derived Product Manufacturers

American Fiber Cushion

Fortitude Cushion Products: 20, 24, 28, 32 and 40 oz.
